Investment policy

The purpose of the sub-fund is the long-term increase in the value of its assets as a result of investing in bonds and other debt securities. The proportion of other investment categories in the sub-fund should be lower than 30% of the value of the assets.

Investments are primarily made on the basis of current ratings and macroeconomic prognoses of the country issuing securities and their impact on market interest rates.

Investor profile

The sub-fund is designated for investors who:

- want to have easy access to the debt securities market,
- are interested in an alternative to direct investment in bonds,
- require investments that are flexible, clear and highly liquid,
- appreciate professional management.

Dictionary

Beta to benchmark – this ratio shows the relation between changes in the value of a fund unit and the benchmark. Beta of 1 means that changes in the value of a fund unit are the same as of the benchmark, which suggests that the composition of instruments in the fund is the same as the composition of instruments in the benchmark. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of a fund unit by less than 1%. Beta over 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

Beta to WIG – this ratio shows the relation between changes in the value of a fund unit and changes in the WIG index. Beta of 1 means that changes in the value of a fund unit are the same as changes in the WIG index. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of the WIG index by less than 1%. Beta over 1 means that a growth (decrease) in the WIG index by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

Information ratio – this ratio shows the profitability of risk borne by the fund compared to its benchmark. The higher the information ratio, the lower the risk at which the return of the fund is generated compared to the benchmark. The fund with the information ratio over 0.3 is considered as effectively managed.

Tracking error – this ratio shows how risky the given fund is compared to its benchmark. The higher the ratio, the more aggressively is the fund managed compared to its benchmark. The ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).

This material is distributed to advertise or promote services provided by Union Investment TFI S.A.

Presented financial information concerns the indicated period in the past and does not constitute a guarantee of achievement of similar results in the future.

The result presented does not include front-load fees associated with investing in a given sub-fund or taxes. Front-load fees and applicable taxes may be deducted from the result.

The UniEURIBOR sub-fund is denominated in EUR. Incoming and outgoing payments by way of purchase or sale of participation units in the sub-fund are made in EUR. In the event a participant intends to obtain investment returns in a currency other than EUR, the participant must take into account the fact that any returns may increase or decrease as a result of currency fluctuations.

The UniDolar Pieniężny sub-fund is denominated in USD. Incoming and outgoing payments by way of purchase or sale of participation units in the sub-fund are made in USD. In the event a participant intends to obtain investment returns in a currency other than USD, the participant must take into account the fact that any returns may increase or decrease as a result of currency fluctuations.

No guarantee of achievement of the objectives of the investment funds; there is a possibility of a decrease in value, including the loss of a part of the invested funds.

A high volatility of the net asset value: UniAkcje Małych i Średnich Spółek, UniAkcje Sektory Wzrostu, UniAkcje: Nowa Europa, UniKorona Akcje, UniKorona Zrównoważony, UniStabilny Wzrost, UniObligacje: Nowa Europa and UniAkcje: Turcja, UniAkcje Dywidendowy in UniFundusze^{FIO}, UniObligacje Aktywny, UniStrategie Dynamiczny, UniAkcje: Daleki Wschód, UniEURIBOR, UniAbsolute Return Uniwersalny, UniAkcje Biopharma, UniAkcje Globalny Dywidendowy in UniFundusze^{SFIO}.

The possibility of the deposit more than 35% of assets of UniKorona Pieniężny, UniKorona Obligacje, UniStabilny Wzrost, UniKorona Zrównoważony, UniStrategie Dynamiczny, UniAkcje: Daleki Wschód, UniAbsolute Return Uniwersalny, UniAktywny Pieniężny, SGB Zagraniczny, SGB Dłużny in securities issued or guaranteed by the Polish Treasury or the Polish National Bank, and in the case of UniDolar Pieniężny, UniObligacje: Nowa Europa, UniAkcje: Turcja, UniAkcje Dywidendowy and UniLokata also in securities issued or guaranteed by: Australia, Austria, Belgium, Bulgaria, Canada, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Great Britain, Greece, Hungary, Iceland, Ireland, Italy, Japan, Latvia, Lithuania, Luxembourg, Malta, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, South Korea, Spain, Sweden, Switzerland, Turkey, United States of America and the European Investment Bank and World Bank (The International Bank for Reconstruction and Development).

Information prospectuses, Key investor information, information for clients of AIF, tables of fees, information on investment risk and taxes are available through the website: www.union-investment.pl.

Union Investment TFI S.A. operates under a licence from the Securities and Exchange Commission (currently: Polish Financial Supervision Authority) of 1 June 1995, no. of decision KPW-4073-1/95.

Sharpe's ratio – this ratio shows the profitability of risk borne by the fund compared to safe investments (e.g. treasury bonds). The higher the Sharpe's ratio, the lower the risk at which the return of the fund is generated compared to safe investments.

Standard deviation – this ratio shows how risky the given fund is. The higher the ratio, the more volatile the price of a fund unit. This ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).

Duration – this ratio shows the change in the value of the debt part of the fund in reaction to a change in interest rates. The higher the duration, the bigger effect of a change in interest rates on a change in the value of a fund unit i.e. the higher the risk connected with the same.
