Stable growth sub-fund of Polish bonds and equities

Level of risk:

minimal

low

moderate

high

highest

Investment policy

The sub-fund invests in debt securities and money market instruments ensuring a competitive interest rate, both fixed and floating. The percentage of those instruments in the portfolio is minimum 60%, stocks are maximum 40% of the portfolio. Decisions on portfolio composition are taken mostly on the basis of the fundamental analysis.

Sub-fund's investments in the aforementioned instruments are made on the basis of the current ratings and forecasts for the macroeconomic situation in the country issuing securities, and their impact on market interest rates. The proportion of the equity and debt parts is determined based on factors affecting the developments in stock markets and the current status and perspectives for profitability of debt securities and money market instruments.

Investor profile

The sub-fund is addressed to investors who:

- want to participate in profits from Polish stocks and at the same time reduce the exposure in stocks by an investment in debt securities,
- demonstrate a moderate risk profile (30/70),
- plan at least a 3-year investment horizon,
- need a transparent investment of high liquidity,
- want to be able to change the sub-fund under the umbrella without tax on capital gains.

Dictionary

Beta to benchmark – this ratio shows the relation between changes in the value of a fund unit and the benchmark. Beta of 1 means that changes in the value of a fund unit are the same as of the benchmark, which suggests that the composition of instruments in the fund is the same as the composition of instruments in the benchmark. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of a fund unit by less than 1%. Beta over 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

Beta to WIG – this ratio shows the relation between changes in the value of a fund unit and changes in the WIG index. Beta of 1 means that changes in the value of a fund unit are the same as changes in the WIG index. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of the WIG index by less than 1%. Beta over 1 means that a growth (decrease) in the WIG index by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

Information ratio – this ratio shows the profitability of risk borne by the fund compared to its benchmark. The higher the information ratio, the lower the risk at which the return of the fund is generated compared to the benchmark. The fund with the information ratio over 0.3 is considered as effectively managed.

Tracking error – this ratio shows how risky the given fund is compared to its benchmark. The higher the ratio, the more aggressively is the fund managed compared to its benchmark. The ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).
