### Investment policy

The sub-fund invests in money market instruments and bonds issued mostly by companies from Poland and CEE countries. Redemption period of these instruments does not exceed one year or interest rates of these instruments are fixed for a period no longer than one year. A basic investment currency is euro.

### Investor profile

The sub-fund is dedicated to institutional investors who:

- have financial surpluses in euro,
- get subsidies from European Union on business development,
- export products to euro zone countries,
- square up in euro with their foreign stockholders,
- prefer short-term investments (maximum one year).

### Dictionary

**Beta to WIG** – this ratio shows the relation between changes in the value of a fund unit and changes in the WIG index. Beta of 1 means that changes in the value of a fund unit are the same as changes in the WIG index. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of the WIG index by less than 1%. Beta over 1 means that a growth (decrease) in the WIG index by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

**Information ratio** – this ratio shows the profitability of risk borne by the fund compared to its benchmark. The higher the information ratio, the lower the risk at which the return of the fund is generated compared to the benchmark. The fund with the information ratio over 0.3 is considered as effectively managed.

**Tracking error** – this ratio shows how risky the given fund is compared to its benchmark. The higher the ratio, the more aggressively is the fund managed compared to its benchmark. The ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).

**Standard deviation** – this ratio shows how risky the given fund is. The higher the ratio, the more volatile the price of a fund unit. This ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).

**Duration** – this ratio shows the change in the value of the debt part of the fund in reaction to a change in interest rates. The higher the duration, the bigger effect of a change in interest rates on a change in the value of a fund unit i.e. the higher the risk connected with the same.

A flat personal income tax rate on the so-called capital gains, including on income from participation in equity funds, is 19%. The tax base (income and expense) and the tax must be denominated in Polish zlotys (PLN). Consequently, to determine the tax (income) base for the so-called currency funds, the taxpayer has to separately establish (translate) the income and tax deductible expenses related to the same, i.e. to make a translation from the foreign currency into PLN. The income is determined (translated) at the "current" exchange rate of the day preceding the day on which income was generated and the expense at the "historical" exchange rate of the day preceding the day on which redeemed or repurchased units of participation in equity funds were acquired. Consequently, flat income tax is computed and charged on amounts denominated in PLN. This material is distributed to advertise or promote services provided by Union Investment TFI S.A.

Presented financial information concerns the indicated period in the past and does not constitute a guarantee of achievement of similar results in the future.

The result presented does not include front-load fees associated with investing in a given sub-fund or taxes. Front-load fees and applicable taxes may be deducted from the result. The UniEURIBOR sub-fund is denominated in EUR. Incoming and outgoing payments by way of purchase or sale of participation units in the sub-fund are made in EUR. In the event a participant intends to obtain investment returns in a currency other than EUR, the participant must take into account the fact that any returns may increase or decrease as a result of currency fluctuations.

The UniDolar Pieniężny sub-fund is denominated in USD. Incoming and outgoing payments by way of purchase or sale of participation units in the sub-fund are made in USD. In the event a participant intends to obtain investment returns in a currency other than USD, the participant must take into account the fact that any returns may increase or decrease as a result of currency fluctuations.

No guarantee of achievement of the objectives of the investment funds; there is a possibility of a decrease in value, including the loss of a part of the invested funds.
