### Investment policy

UniAkcje Wzrostu sub-fund is a financial instrument which allows making profit based on investments in stocks of companies from sectors with high potential on the Polish market and other markets from Central and Eastern Europe. Investments are based on fundamental analysis and qualitative assessment of companies in sectors. There is a possibility of matching or changing companies in the portfolio depending on their growth perspectives.

### Investor profile

The sub-fund is addressed to investors who:

- want to make profit by investing simultaneously in a few sectors with high growth potential and benefit from the opportunities offered by a unique investment strategy (the first sub-fund on the Polish market which is not confined to one sector),
- are interested in active management in-between sectors,
- plan at least a 5-year investment horizon.

### Dictionary

**Beta to WIG** – this ratio shows the relation between changes in the value of a fund unit and changes in the WIG index. Beta of 1 means that changes in the value of a fund unit are the same as changes in the WIG index. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of the WIG index by less than 1%. Beta over 1 means that a growth (decrease) in the WIG index by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

**Sharpe's ratio** – this ratio shows the profitability of risk borne by the fund compared to safe investments (e.g. treasury bonds). The higher the Sharpe's ratio, the lower the risk at which the return of the fund is generated compared to safe investments.

**Standard deviation** – this ratio shows how risky the given fund is. The higher the ratio, the more volatile the price of a fund unit. This ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).

### Risk measures
