Investment policy

The sub-fund invests in money market instruments and bonds issued by Central and East European countries, corporate bonds and other debt securities issued by entities domiciled in Central and East European countries, as well as other debt securities not mentioned above. The proportion of other investment categories in the sub-fund should be lower than 30% of the value of the assets. Sub-fund geographic area: Poland, Czech Republic, Slovakia, Hungary, Turkey, Lithuania, Latvia, Estonia, Slovenia, Cyprus, Kazakhstan, Malta, Bulgaria, Romania, Ukraine, Macedonia, Croatia, Bosnia and Herzegovina, Serbia, Montenegro, Albania.

Investments are primarily made on the basis of current ratings and the development prognoses for the macroeconomic situation of the country issuing securities, and their impact on market interest rates.

Investor profile

The sub-fund is addressed to investors who:

- demonstrate a moderate risk profile,
- plan at least a 2-year investment horizon,
- want to mitigate the risk by geographical diversification in the region,
- want to have a transparent form of investment with high liquidity,
- want to be able to change the sub-fund under the umbrella without tax on capital gains.

Dictionary

Beta to benchmark – this ratio shows the relation between changes in the value of a fund unit and the benchmark. Beta of 1 means that changes in the value of a fund unit are the same as of the benchmark, which suggests that the composition of instruments in the fund is the same as the composition of instruments in the benchmark. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of a fund unit by less than 1%. Beta over 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

Beta to WIG – this ratio shows the relation between changes in the value of a fund unit and changes in the WIG index. Beta of 1 means that changes in the value of a fund unit are the same as changes in the WIG index. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of the WIG index by less than 1%. Beta over 1 means that a growth (decrease) in the WIG index by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

Information ratio – this ratio shows the profitability of risk borne by the fund compared to its benchmark. The higher the information ratio, the lower the risk at which the return of the fund is generated compared to the benchmark. The fund with the information ratio over 0.3 is considered as effectively managed.

Tracking error – this ratio shows how risky the given fund is compared to its benchmark. The higher the ratio, the more aggressively is the fund managed compared to its benchmark. The ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).
