Investment policy

The sub-fund invests minimum 70% of assets in stocks of small and mid-sized companies. The category of "small and mid-sized companies" comprises companies whose stocks are admitted to trading in the regulated market or introduced to an alternative trading system, except for those whose market capitalisation (i.e. the market price of the company's stocks multiplied by the quantity of stocks issued by the same) exceeds the Polish zloty equivalent of 5 billion euro. Up to 30% of assets is invested in short-term debt securities and money market instruments.

The sub-fund's assets may be invested in other financial instruments as permitted by the law and the provisions of the fund's charter.

The sub-fund's investments in stocks and other securities are made mostly on the basis of the fundamental analysis. The main criteria of analyses include market and technological advantages of companies, the quality of business management, the share of stocks in the stock exchange indices, and liquidity of such stocks.

Sub-fund profile

Recommended minimal investment horizon:

Investor profile

The sub-fund is addressed to investors who:

- want to participate in profits of small and mid-sized companies.
- accept a very high risk – much higher compared with equity funds investing in companies with high capitalisation.
- plan at least a 5-year investment horizon.
- want to have a transparent form of investment with high liquidity.
- want to be able to change the sub-fund under the umbrella without tax on capital gains.

Dictionary

Beta to benchmark – this ratio shows the relation between changes in the value of a fund unit and the benchmark. Beta of 1 means that changes in the value of a fund unit are the same as of the benchmark, which suggests that the composition of instruments in the fund is the same as the composition of instruments in the benchmark. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of a fund unit by less than 1%. Beta over 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

Beta to WIG – this ratio shows the relation between changes in the value of a fund unit and changes in the WIG index. Beta of 1 means that changes in the value of a fund unit are the same as changes in the WIG index. Beta below 1 means that a growth (decrease) in the benchmark by 1% is usually connected with a growth (decrease) in the value of the WIG index by less than 1%. Beta over 1 means that a growth (decrease) in the WIG index by 1% is usually connected with a growth (decrease) in the value of a fund unit by more than 1%.

Information ratio – this ratio shows the profitability of risk borne by the fund compared to its benchmark. The higher the information ratio, the lower the risk at which the return of the fund is generated compared to the benchmark. The fund with the information ratio over 0.3 is considered as effectively managed.

Tracking error – this ratio shows how risky the given fund is compared to its benchmark. The higher the ratio, the more aggressively is the fund managed compared to its benchmark. The ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).
